

Stormwater Construction Certification for SFD/Duplex Lots with an Approved Subdivision Stormwater Management Plan.

Lot: _____ Subdivision: _____

Street Address: _____

As-Built Certification

The following shall be completed by a Florida Registered Professional Engineer and submitted with the As-Built Boundary Survey for a Certificate of Occupancy. (NOTE: No changes shall be made to this section.)

(NOTE: No changes shall be made to this section.)

I hereby certify that the stormwater management facility/system and lot specific portion thereof has been built in accordance with the above referenced design certified plans (signed, dated, and sealed) and that any deviations, clarifications, and/or qualifiers (as attached) shall not prevent the facility/system from functioning in compliance with the requirements stated within Land Development Code, Article 10, Section 10.03.00, Stormwater Management, when properly maintained and operated (Attach an owner signed and dated Operation and Maintenance Agreement.). These determinations have been based upon an on-site inspection of the construction, scheduled, and conducted by me or by a project representative under my direct supervision.
